

Families In Sumo Exhibition

by Mark Buckton

Not unlike an SFM piece on siblings in sumo a while ago, the Nihon Sumo Kyokai Museum will, on January 7th, unveil a special exhibition on families in sumo and the father / son or sibling relationships seen throughout the history of this ancient sport.

Included will be several father / son or brother pairings most have little or no knowledge of

and at least one 'pair' of severed but related, oicho-mage.

For those unable to visit the exhibition in person, SFM will carry a bonanza of the exhibits with the permission of the NSK Museum - keep watching this space!

The exhibit will run until February.
